The Manual on Stream Gauging (WMO No. 519) was first released in 1980. Since then, however, there have been significant advances both in the approach and the methodologies employed. Consequently, at its twelfth session (Geneva, October 2004), the WMO Commission for Hydrology (CHy) decided to meet the identified needs of the National Hydrological Services by revising the Manual to include the newer technologies that have been introduced over the period and are currently employed in this crucial field. In this context, Volume I of the manual encompasses the topics of gauge height measurement, stream velocity and stream discharge, whilst Volume II focuses on the discharge rating relationship.--Publisher's description. The 1995 National Household Education Survey (NHES:95) was a random digit dial telephone survey of households developed by the National Center for Education Statistics. The NHES:95 included two topical survey components: the Adult Education component, which collected information about adults' participation in adult education, and the Early Childhood Program Participation (ECPP) component, which collected information about children's participation in nonparental child care and early childhood programs. This manual provides documentation and guidance for users of the public release data file for the ECPP component. Information about the purpose of the study, the data collection instruments, the sample design, and data collection and data processing procedures is provided. Some information about factors that should be kept in mind when using ECPP data is also provided. For the ECPP component, interviews were conducted with parents of 14,064 children, a figure that included 101 home schooled children. Four appendixes present screening and study questionnaires, information about the file layout, the Statistical Analysis System code for derived variables, and the ECPP codebook. (Contains 8 tables, 2 figures, and 23 references.) (SLD) The 1996 National Household Education Survey (NHES:96) was a random digit dial telephone survey of households that was developed by the National Center for Education Statistics and conducted by Westat, Inc. The NHES:96 included two topical survey components, "Parent and Family Involvement in Education," (PFI) which collected data about family involvement in children's schooling, and "Civic Involvement," (CI) which collected data about participation in civic activities and attitudes toward government. This manual provides documentation and guidance for users of the four public release data files of the NHES:96: the Household and Library File, the PFI and CI files, the Youth Civic Involvement file, and the Adult Civic Involvement File. Volume I contains information about the purpose of the study, the data collection instruments, the sample design, and data collection and data processing procedures. Volumes II through V each contain a guide to the data file and its codebook, a discussion of data considerations and anomalies, and, in appendixes, the file layout and additional information. This volume contains the following sections: (1) "Introduction"; (2) "Description of Data Collection Instruments"; (3) "Sample Design and Implementation"; (4) "Data Collection Methods and Response Rates"; and (5) "Data Preparation." An appendix presents the screener for the four files. (Contains 1 figure, 17 tables and 25 references.)
